Letter of reference

Dear xnet team,

it's been over a year now and we still enjoy looking back at our event with over 60 people from September 5th - 7th 2013.

With our annual "Customer Advisory Board" it is always a new one challenge of offering our guests something special. The participants of the Event come together from around the world to be in a suitable setting to conduct business in the form of a business talk and knowledge exchange. Another very important point is the shared experience of features like team spirit which create a sense of community. After the event in the past years in big cities, this time it should be something completely different, which was a big task for us.

The "rent a village by xnet" concept mastered this task and has given our event a very specific value and emotionality.

Even today - a year later - our customers talk to us about this successful event and tell us that they have traveled privately a second time to spend their vacation there. The sustainability that this concept promises can be hereby fully confirmed.

On behalf of the management and all participants we would like to thank you for the sensational Cooperation and your flexibility and reliability. From the planning phase through the preparation, the implementation and also the follow-up we always had the feeling to be in good hands with you as a partner.

*Christine Neumann
