

Feedback Xnet

On June 10-11, 2015 our company held an event on fire in the sense of the Rent-a-Village by Xnet concept.

In advance we traveled to a location check for Brand, where we checked the conditions on site could look at and evaluate. Mr. Schwärzler took a lot of time for this and demonstrated the possibilities with great enthusiasm. It quickly became clear that this was unique Concept that is absolutely extraordinary and sustainable at the same time. So the decision was for our Organization team was quite simple, namely that our event should take place here.

When planning the event, Mr. Schwärzler demonstrated enormous flexibility by always responding to our requests and adapting the overall planning. Short-term changes were also not a problem during the event and Mr. Schwärzler brought all his experience and organizational talent to the table. Together with his very friendly staff, he created an unforgettable event for our department.

The presentations, which were held far away from a boardroom in the great outdoors with a breathtaking panorama, were very impressive for the participants and were accordingly impressive. The culinary part of the event was very good and an all-round success, where everyone got their taste.
